BS Artificial Intelligence Student | Aspiring AI Engineer

ABOUT ME

Bachelor of Artificial Intelligence student at the University of Wah, currently in my 3rd semester, working toward a professional career as an AI Engineer. My interests include Python development, Artificial Intelligence, Machine Learning, and building practical software solutions. I believe in learning by building — turning academic concepts into practical projects and using GitHub to document my learning journey.

ACADEMIC JOURNEY

Degree	BS Artificial Intelligence
University	University of Wah
Current Semester	3rd Semester
Expected Graduation	2029
Current CGPA	3.00
Latest Semester GPA	3.22

TECHNICAL SKILLS

- Programming Languages: Python (primary), C, C++, Java
- Web Development: Django, HTML, CSS
- Database & Development Tools: MySQL
- Computer Science Fundamentals
- Artificial Intelligence & Machine Learning — building foundation while strengthening programming and problem-solving skills

PROJECTS

Regularly build and upload programming projects to GitHub as part of my learning journey, including a Django-based Noodle Store website, a Job Portal, and a personal portfolio website.

CURRENT LEARNING

- Improving Python programming & software development practices
- Exploring Artificial Intelligence and Machine Learning fundamentals
- Strengthening database skills and problem-solving ability
- Building more practical, portfolio-worthy projects

CAREER GOAL

To become a professional AI Engineer and build intelligent, practical, and reliable software solutions — continuously strengthening my knowledge in AI, Machine Learning, Python, and software development through hands-on project experience.
